

Richter low-pressure safety valves

for gauge pressure and vacuum

TÜV.SV.06 - 1058
certified
for vapours,
gases, fluids

Thick-walled PFA/PTFE lining

Hermetically tight

Set pressures from
-1.7 psi to +1.7 psi
(-120 mbar to +120 mbar)

-76 to +400 °F (-60 to +200 °C)

Richter low-pressure safety valve

Fields of application

The direct-acting overflow valve of the LPV series is designed for use with corrosive and pure liquids, gases and vapours. In process plants it is used

- in the range from -1.7 psi (-120 mbar) vacuum up to +1.7 psi (+120 mbar) gauge pressure at temperatures of up to 400°F (200°C)
- for venting during filling
- for respiration during emptying
- in the case of process or temperature-related volume variations
 - in reactor columns
 - in vessels with enamel or plastic lining, made of Hastelloy®, tantalum etc. or glass
 - in vessels with protective gas layers

The LPV can be installed as an angle valve on a vessel or as an inline valve in a pipe.

Product features

The LPV series offers plant operators major advantages: The set pressure can be adapted to suit subsequent changes in operating parameters by the addition/removal of weights. The LPV is gas and liquid-tight to DIN 3230 Part 3, bubble-tight. Compromise solutions, e.g. ball check valves, are no longer necessary.

Other features:

- direct-acting, weight-loaded
- proportional opening characteristic
- top-entry design, very easy maintenance
- wetted surfaces anti-adhesive thanks to PFA/PTFE
- Body PN 16, flanges ISO 7005-2 type B PN 16 (formerly DIN2532/33), on request drilled to ANSI B16.5 Cl.150, BS, JIS
- Installation: valve bonnet vertical
- Identification to DIN EN 19, ANSI B16.34

Type codes

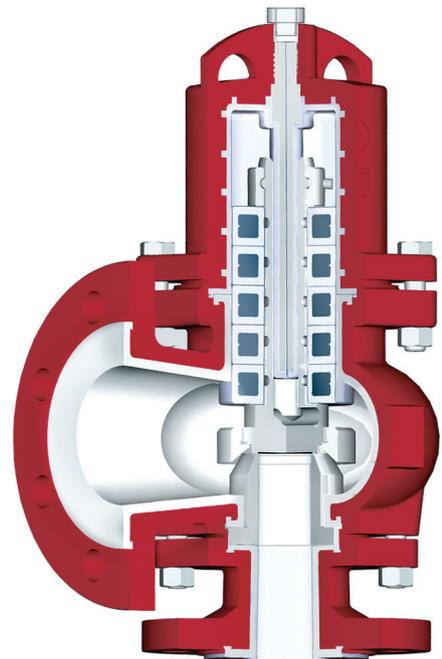

- Angle valve LPV-A/...
- Inline valve LPV-D/...

Lining:

- PFA and PTFE .../F
- antistatic PFA-L/PTFE-L .../F-L

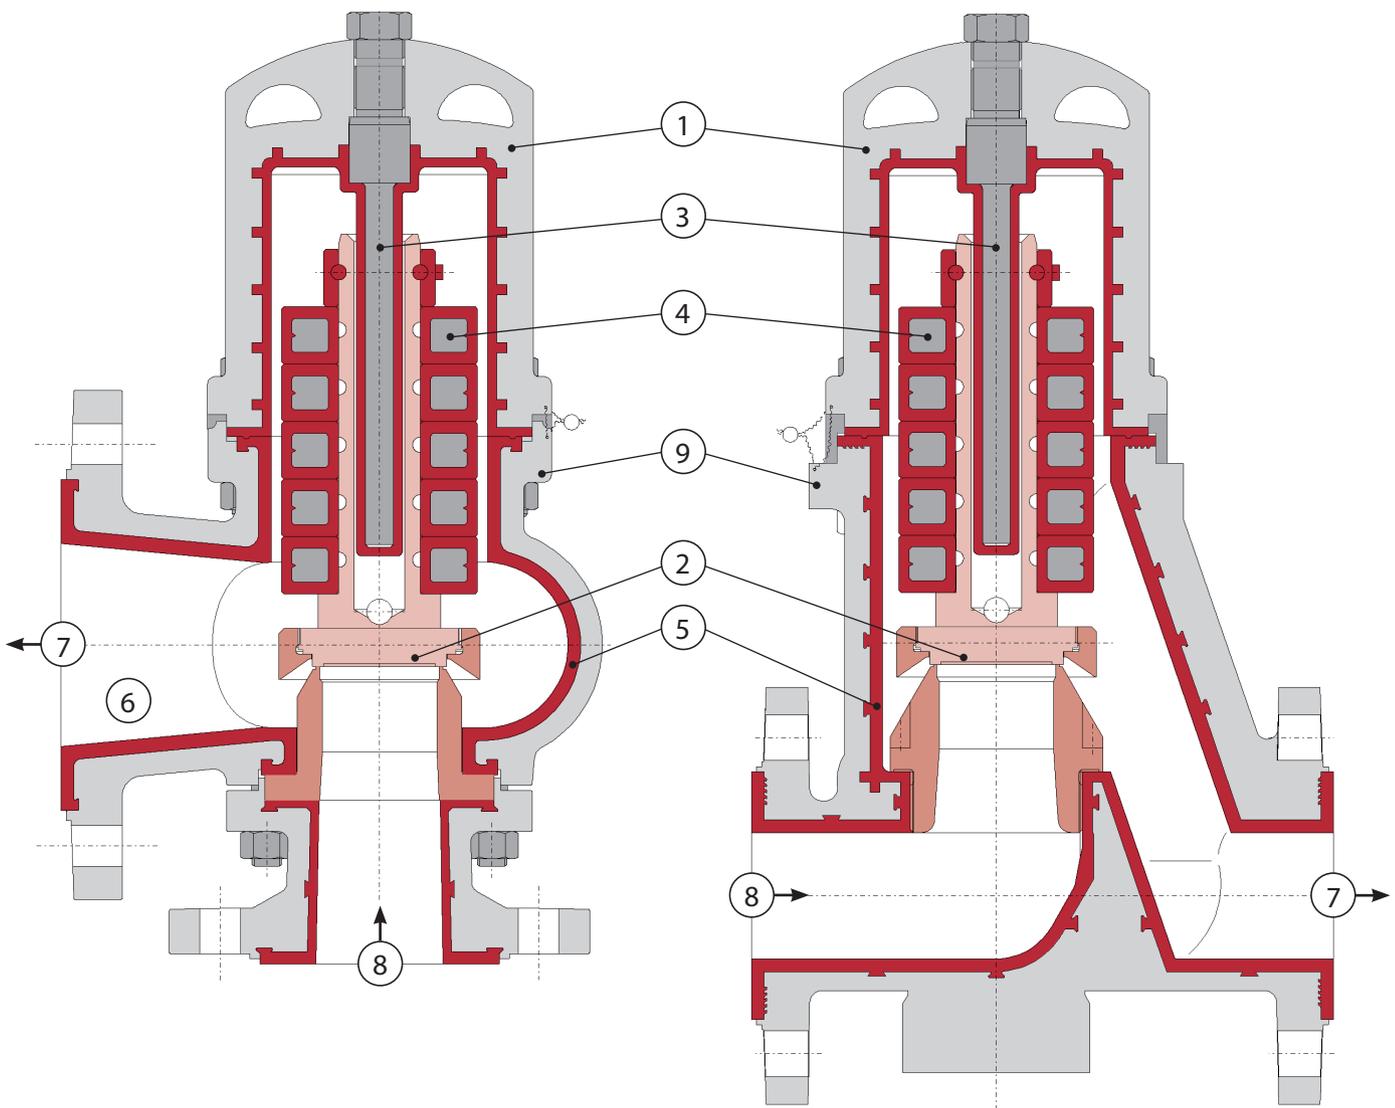

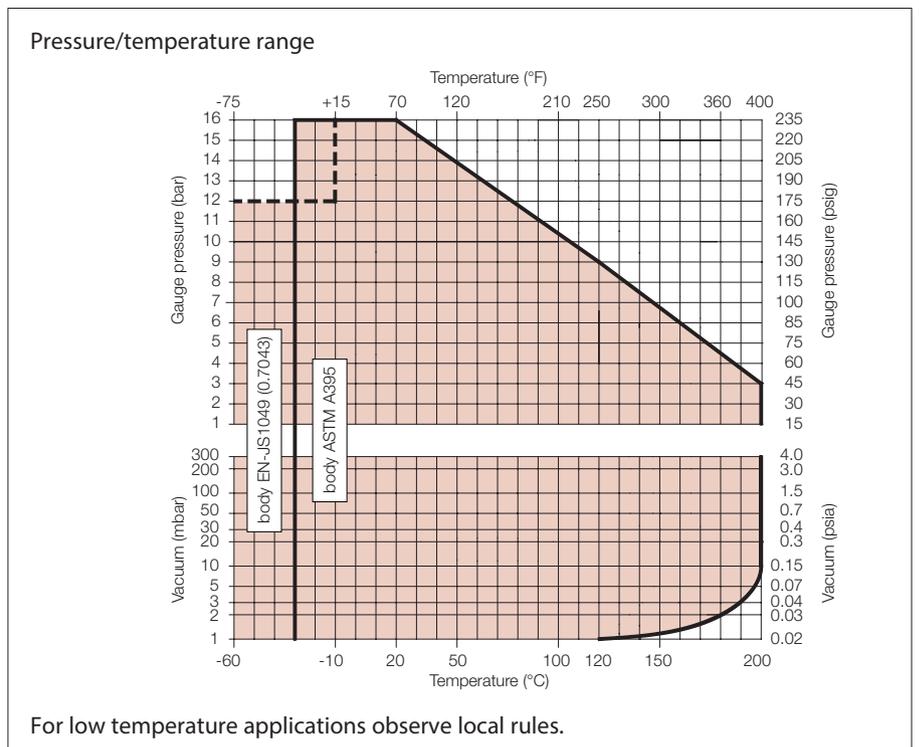

Richter: WZ Richter Chemie-Technik GmbH
Hastelloy: WZ Haynes

- ① Body, inlet nozzle and bonnet made of ductile cast iron EN-JS 1049/ASTM A395
 - absorb system and pipe forces
 - accurate centering through metallic fits
- ② **Maintenance-friendly: seat and plug can be replaced individually**
The lifting aid promotes response characteristic, close function tolerances even at very low test pressures.
- ③ **Hermetically tight against the atmosphere:**
No stem guide, seamless lining
- ④ **Simple, fast and accurate adjustment of the set pressure**
 - Vapours/gases/liquids: certified in the range of
 - set pressure +0.3 psi to +1.7 psi (+20 mbar to +120 mbar)
 - test vacuum -0.3 psi to -1.7 psi (-20 mbar to -120 mbar)
 - other pressures on request
 - Certification No. TÜV.SV.01-1058
 - For more detailed information, see VdTÜV information sheet 1058
 - Weights can be varied in 0.07, 0.15 and 0.30 psi (5, 10 and 20 mbar) increments, also possible after installation and in the operator's workshop.
 - Stainless steel core in guide ensures **dimensional stability even at high temperatures**. Core of the guide optionally Hastelloy® C4 (2.4610)

Angle valve LPV-A

- ⑤ **Thick-walled lining made of virgin, pure PFA/PTFE**
 - high permeation resistance
 - vacuum-proof anchored
 - conductive lining optional
 - universal application for highly corrosive, pure, hot and highly permeating media, also in multi-purpose and pilot plants
- ⑥ Divergent outlet, therefore self-draining, almost no medium residue in the valve body
- ⑦ Vessel connection for vacuum application
- ⑧ Vessel connection for gauge pressure application
- ⑨ External corrosion protection: Epoxy coating, nuts and bolts made of stainless steel

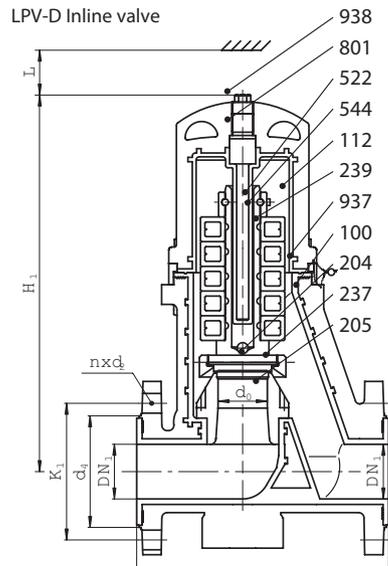

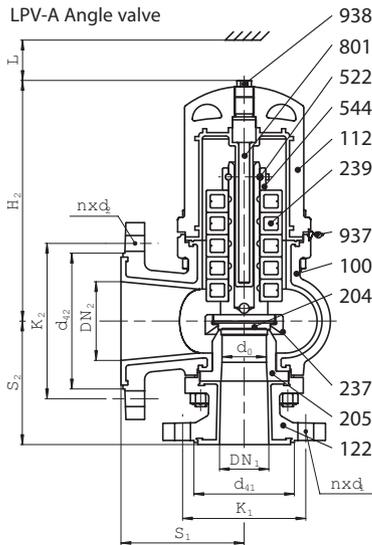

Low pressure overflow valve LPV-A as angle valve

Low pressure overflow valve LPV-D as inline valve

pressure drop = opening pressure - back pressure

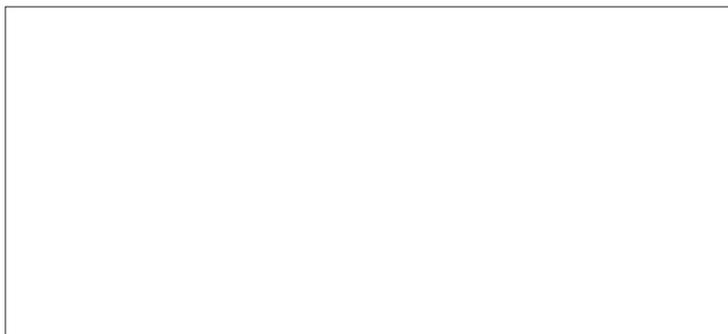

m_n³/h = standard cubic metre (68 °F and 14.7 psi (20 °C, 1013 mbar))

Components and Materials

Item	Designation	Material
100	Body	Ductile cast iron EN JS 1049/ASTM A395, lining* PFA resp. PTFE
112	Bonnet	Ductile cast iron EN JS 1049/ASTM A395, lining* PFA
122	Inlet nozzle	Ductile cast iron EN JS 1049/ASTM A395, lining* PFA
204	Plug	PTFE, optionally antistatic
205	Seat	PTFE, optionally antistatic
237	Lifting aid	PTFE, optionally antistatic
239	Weights	0.07 psi (5 mbar)
		0.15 psi (10 mbar)
		0.29 psi (20 mbar)
		solid PTFE
		PTFE, core stainless steel, optionally: core Hastelloy® C
522	Round cord	PTFE
544	Support ring	PTFE
549	Centering ring	Stainless steel
801	Guide	PFA*, core stainless steel, optionally: core Hastelloy® C
937	Lead seal	Plastic
938	Hex. head screw plug	Stainless steel
w/o no.	Body screw	Stainless steel, other materials on request

* antistatic lining on request
